Innovations act like a driving force for the economy. Technology and its fast expansion as well as its acceptance have become a vital factor, which affects almost all the sectors including agriculture, manufacturing and services. Innovations and technological advancements play a significant role in deciding the way businesses and ventures participate in the nation’s economic development as well as their expansion across the world.

At present, the world is changing rapidly and competitiveness of businesses need to be maintained through continuous innovations by bringing in new technologies for improving the quality standards as well as building adequate infrastructure support accordingly. In recent years, there has been a huge progress in the field of science and technology, which provides large scope of technological upgradations in different areas. In order to improve tools and machineries for all the businesses, efforts have been made to establish appropriate laboratories, technology centres and incubation units for their support.

Technology and its rapid growth affect the way of working of the businesses and ventures. It also plays a major role in making Micro, Small, and Medium Enterprises (MSMEs) adaptive to the global economy. In such a scenario, the need for Business Incubators (BI) arises to promote and support creativity of individual innovators and to assist them to become technology-based entrepreneurs. BIs are essential to accelerate technological development, shaping innovative ideas into actual Industrial upgradations, resulting in successful businesses.

To upgrade the technology, we need to have infrastructural support for enabling the enterprises to develop innovative ideas, which are not only useful for MSMEs but also for the complete industrial system. Business Incubators are also needed for assisting entrepreneurs in commercialisation in order to accelerate such technologies from plain ideas to successful enterprises and generate employment opportunities.

The main objective of the schemes of the Ministry of MSME is to promote and support untapped creativity of individual and to promote adoption of latest technologies in manufacturing as well as knowledge based innovative MSMEs or ventures. The Ministry also supports engagement with MSME- Technology Centres who advise such MSMEs in expanding the business by supporting them in design, strategy and execution. The Technology Centres play an essential role and acts like an integral part in development of business.
UK SINHA COMMITTEE MADE 37 MAJOR RECOMMENDATIONS ON MSME

The Reserve Bank of India (RBI) expert committee under Shri U.K. Sinha made 37 major recommendations on Ministry of MSME. To review implementation status of the recommendations of the Committee, a meeting of Committee of Secretaries (CoS) under the Chairmanship of Cabinet Secretary was held on 31.10.2019. A portal has been developed https://dashboard.msme.gov.in/rbi to facilitate online monitoring of the implementation status of RBI Committee recommendations. Most of the Ministries/Departments have uploaded their comments on the portal.

Mould Your Life As You Want

Rubhay Plastics

PMEGP scheme of KVIC proved to be a turning point in the mundane life of Mr Bhrugesh Kumar P Vyas. He had an MBA, but could not get a satisfying job and worked in an injection moulding unit for Rs. 12,000 monthly.

To make his life better, he approached KVIC, who advised him to set up his own enterprise with the help of PMEGP scheme. He got exposure through Entrepreneurship and Skill Development Programme at RSETI, Gandhinagar, Gujarat, which gave him confidence that he needed the most.

Later, he was sanctioned a loan of Rs. 21,40,000 under PMEGP scheme. Now, Mr Vyas is a proud owner of ‘Rubhay Plastics’ and expresses his sincere gratitude to the PMEGP scheme for guiding him to lead a successful life.

Service Unit

Mr Rinku Baruah, who hails from Assam, completed his graduation and started looking for a job to support his family. Coincidentally, he got to know about National Small Industries Corporation (NSIC) and its schemes for educated unemployed youth.

After three months training under Entrepreneurship and Skill Development Programme, he opened a service unit for repairing computers, bookbinding, DTP, etc. along with a food court.

At present, he is earning well and gives employment to nine other people. Mr Baruah leads a happy life and gives its credit to NSIC for providing him entrepreneurship career.
